

Roxborough Village Metropolitan District

c/o R. S. Wells 8390 E. Crescent Parkway, Suite 500
Greenwood Village, CO 80111-2814 (303)-779-4525

Dear Resident,

The Roxborough Village Metropolitan District will begin a construction project in your area Monday October 24, 2011 and continue through the winter until completion. The timeline for this project is completely weather dependant and could be very short or last until early spring depending on how much snow falls in the area. The purpose of this project is to upgrade the Irrigation System main pipeline that runs through the landscape areas next to the pond, through the residential access tracts, and connect to the main park on the west side of Rampart Range Road. This will be a benefit to every resident in the Roxborough area that utilize the parks and open space that the District maintains. You will see changes to landscaping and irrigation conservation use starting in the 2012 season and gradually being implemented over the next several years. Every effort possible will be made to keep the impacts of this project to a minimum. The Project limits are shown in blue on the map below.
